

# Rolls Royce Headquarters Chichester UK

Grant Associates created the landscape design for a new headquarters and assembly centre for Rolls Royce, set within the sensitive landscape of the Goodwood estate which can be viewed from Goodwood House and the South Downs Area of Outstanding Natural Beauty.

The scheme incorporates a strong framework of earthworks with water management features, extensive use of green roofs (the largest in Europe), and strategic placing of new woodlands and hedgerows. The internal site landscape reflects the quality and sophistication of the Rolls Royce marque and ties in with the high-calibre architecture of the buildings.

The landscape acts as a backdrop to the main site activities, while also offering a sense of theatre in the sequence of experiences for visitors and staff users.

**Site Area:** 100 Hectares  
**Client:** BMW Motor Cars Ltd  
**Architects:** Nicholas Grimshaw and Partners  
**Engineers:** Buro Happold  
 WSP Civil and Structural Engineers  
**Other Collaboration:** Terence O'Rourke Environmental Planners  
**Overall Project Value:** £50 million
